

Gabriel San Martin

 gasanmartin |  gabisanmartin12@gmail.com

I'm a JavaScript developer with more than 8 years of experience

SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS, SQL
- **Technologies:** React, React Native, Next.js, React Query, Redux, Storybook, Styled Components, Node.js, Jest, Git, GitHub, Heroku, AWS, Firebase, Datadog, Retool

PROFESSIONAL EXPERIENCE

Z League - Frontend Developer

Feb 2021 - March 2024

- Enhanced the **React Native** application by optimizing images, transferring less frequently accessed images to an **AWS S3 bucket**, and downloading them on demand. Additionally, removed redundant code and dependencies, resulting in a 50% reduction in the application's bundle size.
- Implemented internationalization in the **React Native** application, thereby enabling the company to reach out to a potential market of approximately 500 million people.
- Optimized user experience by enabling seamless background file uploads, empowering users to utilize their devices uninterrupted while files are processed, effectively eliminating wait times.

Accelone

Sep 2020 - Feb 2021

Candidate viewer - Fullstack Developer

- Executed a complete application migration within one month, resulting in an enhanced client experience when selecting consultants.
- Led the implementation from end to end, taking charge of establishing the foundations for both frontend (**React**) and backend (**NodeJs**) projects.
- Crafted a new database architecture, normalized existing data, and scripted the migration process from the old database to the new by using **NodeJs**.

SousZen - Frontend Developer

- Integrated Google Maps API on a **React** application to optimize the visualization of company branch locations, resulting in enhanced user experience and improved navigation.

Chopra - Backend Developer

- Implemented a **NodeJs** daemon to monitor an FTP server folder, enhancing the efficiency of sales order processing. This involved processing orders and transforming them into a new format compatible with another daemon. As a result, processing times were significantly reduced, and resource utilization was optimized.

Claro - Technical Lead

Jun 2018 - Aug 2020

- Led the migration and optimization of the coverage website to **React**, achieving an impressive 85% reduction in loading time. This initiative significantly enhanced the user experience for call center staff.
- Facilitated the adoption of the new development pipeline among my team members by conducting an online training session, effectively aligning the team with internal processes.
- Developed a **Javascript's** technical assessment to evaluate developers during interviews. I meticulously analyzed the solutions received, providing my professional insights and opinions to my superiors about the candidates' abilities and suitability for the position.

Mutual Jerárquicos - Fullstack Developer

Aug 2016 - May 2018

- Played a key role in the development of the iOS native application MVP, contributing to its conceptualization, design, and implementation phases.
- Crafted an efficient online tool for document visualization, seamlessly integrating with an FTP server. This initiative greatly enhanced accessibility, enabling multiple users to effortlessly access over 1000 digitized documents.

Serfe - Backend Developer

Dec 2015 - July 2016

- Spearheaded comprehensive requirements analysis, meticulous task breakdown, and precise time estimation for prospective clients, delivering invaluable insights and laying the groundwork for successful project execution.
- Tested and validated developments executed by my colleagues, ensuring top-notch quality and seamless functionality across all projects.

EDUCATION

National University of the Littoral
Informatics Engineering

Santa Fe, Argentina
March 2010 - Dec 2016
